SUMMARY

Data Analyst with hands-on project experience in Python, SQL, MySQL, Excel, and Power BI. Skilled in data cleaning, data transformation, exploratory data analysis (EDA), and building interactive dashboards that convert raw data into actionable business insights. Experienced in writing complex SQL queries (joins, aggregations, grouping), working with relational and NoSQL databases, and delivering end-to-end analytical projects independently, with strong problem-solving and data storytelling ability.

KEY PROJECTS

Retail Sales Data Analysis — Personal Project | Excel, SQL, Python, Pandas, Power BI

- Cleaned and transformed retail sales data using Excel/Power Query to prepare it for analysis.
- Performed sales analysis using SQL and Python/Pandas to uncover trends and performance drivers.
- Analyzed category-wise, city-wise, monthly, and product-wise sales performance to surface actionable patterns.
- Created an interactive Power BI dashboard to visualize KPIs, sales trends, and overall business performance.
- Identified key business insights such as high-performing categories, cities, and sales periods to support decision-making.

Netflix Data Analysis — Personal Project | Excel/Power Query, Power BI, Python/Pandas

- Cleaned and transformed Netflix titles data using Power Query to ensure consistency and accuracy.
- Analyzed Movies vs. TV Shows, ratings, countries, genres, and release trends across the catalog.
- Created an interactive Power BI dashboard with KPIs, charts, and slicers for dynamic exploration.
- Analyzed top 10 countries, top 10 genres, and title trends by year to identify content patterns.
- Derived insights from Netflix's content distribution and catalog trends to inform data-driven observations.

Hospital Data Analysis — Personal Project | MySQL, SQL, Power BI

- Analyzed hospital data using MySQL to derive insights on patients, appointments, doctors, departments, treatments, and billing.
- Developed 50+ SQL queries using JOINS, aggregations, GROUP BY, ORDER BY, and date functions for business analysis.
- Analyzed revenue, appointment trends, treatment costs, payment status, and city/department performance.
- Built an interactive Power BI dashboard to visualize key hospital KPIs and operational insights.

Statistical Data Analysis — Personal Project | Excel, Python, Pandas, NumPy, Matplotlib, Statistics

- Performed descriptive statistical analysis on the dataset to understand data distribution and patterns.
- Calculated mean, median, mode, range, variance, and standard deviation to summarize the dataset.
- Analyzed data using measures of central tendency and dispersion to interpret variability.
- Used Python/Pandas and visualization techniques to explore relationships and identify patterns.
- Presented statistical findings through charts and summarized key insights for easy interpretation.

TECHNICAL SKILLS

- Languages: Python, Java, C, SQL
- Databases: MySQL, SQL, MongoDB, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis
- Data Analytics & Visualization: Power BI, MS Excel (Pivot Tables, Pivot Charts, VLOOKUP/XLOOKUP, INDEX-MATCH, Conditional Formatting, Data Validation), Data Visualization, Data Storytelling
- Analytics & ML: Machine Learning (Predictive Modeling), Django, Data-Driven Decision Making
- Web Technologies: HTML, CSS, JavaScript
- Core Concepts: Object-Oriented Programming, Problem Solving, Requirements Analysis

ACHIEVEMENTS & CERTIFICATIONS

- 30 Days Power BI Micro Course — SkillCourse (August 2026)
- Java Programming Certification — Prime Step
- NPTEL Certificate in Cloud Computing
- Independently built and deployed 4 real-world web and software projects
- Recognized for creativity in project presentation and UI design at university-level technical events

EDUCATION

Shri Vaishnav Vidyapeeth Vishwavidyalaya — Pune, India | 2022 – 2026

Bachelor of Technology (B.Tech), Computer Science & Engineering

CGPA: 5.91 / 10
